

# QUFI EXECUTIVE SUMMARY

## THE PROOF LAYER FOR THE POST-QUANTUM ECONOMY

QuFi is a neutral verification network that sits beneath every blockchain, moving asset, institution, and AI agent.

We bring post-quantum security, real-time verification, and global scale to the value layer of the internet.

**No new L1**

We don't replace what works.

**No migration**

Zero disruption for chains.

**No state**

No state replication.

**No consensus**

No consensus requirement.

### OUR OPPORTUNITY IS SIMPLE:

Become the verification rail underneath high-value digital settlement.

### PROOF THAT THE MODEL CAN RUN

#### uBTC

Our Bitcoin-backed stable digital instrument demonstrates the proof-gated lifecycle.

#### POST-QUANTUM SIGNING

ML-KEM key exchange and digital signatures secured with quantum-resistant cryptography.

#### COLLATERAL CONFIRMATION

Bitcoin deposits are verified before value moves, eliminating custodial risk.

#### PROOF-GATED MOVEMENT

Transfer value only when a compact proof is delivered and verified.

#### RECOVERY

Wallets, accounts and digital instruments recoverable cryptographically.

BENEATH THE FUTURE OF GLOBAL VALUE.

# 01.

## THE INVESTMENT CASE

The world is entering a post-quantum era. Digital assets, tokenized real-world assets, stablecoins, and AI agents are moving value at a pace the existing infrastructure was never designed to handle.

QuFi provides the missing layer: a neutral, post-quantum, verification network that delivers cryptographic certainty before value moves and preserves decentralization without forcing migration.

### INSTRUCT → VERIFY → SETTLE

#### INSTRUCT

Transaction or financial action is defined.

#### VERIFY

QuFi performs the computationally expensive verification and emits a compact, verifiable proof.

#### SETTLE

The chain receives the proof and settles the resulting state.

#### MASSIVE MARKET OPPORTUNITY

## \$200T+

addressable market across digital and real-world value.

#### NEUTRAL & UNIVERSAL

Works across any chain, any asset, any system without migration or disruption.

#### POST-QUANTUM SECURITY

Built with quantum-resistant cryptography to protect value for decades to come.

#### SCALABLE ECONOMICS

High-value verification delivered at global scale through a decentralized node network.

## OUR BUSINESS MODEL

#### NETWORK CAPITAL

20,000 verification nodes

| TIER LEVEL            | MODEL    |
|-----------------------|----------|
| Opening node          | \$3,200  |
| First node            | \$23,900 |
| Average staker price  | \$23,150 |
| Full anti-fraud layer | \$163M   |

The node ladder increases by \$190 every 100 nodes sold, creating an engineered scarcity curve.

#### RECURRING PROOF FEES

0.1% of value verified

The model uses an assumption of 0.1% of higher of an average system value across the top ten networks.

|                 |          |
|-----------------|----------|
| 1% penetration  | \$145.6M |
| 5% penetration  | \$727.5M |
| 10% penetration | \$1.455B |

#### MULTIPLE HIGH-VALUE FLOWS

#### REAL WORLD ASSETS

Tokenized stocks, gold, commodities & more

#### MONEY

Stablecoins, deposit tokens, CBDC, payment settlement

#### TRADE FINANCE

Instruments, guarantees, letters of credit

#### ANNUAL REVENUE POTENTIAL (AT SCALE)

#### 1% PENETRATION

\$145.6M

#### 5% PENETRATION

\$727.5M

#### 10% PENETRATION

\$1.455B

THE CHAIN STAYS.  
THE PROOF EVOLVES.

## WHY QUFI CAN BECOME A CATEGORY-DEFINING COMPANY

- ✓ First neutral verification layer that does not depend on settlement chains.
- ✓ Largest crypto and RWA markets moving on-chain in the next decade.
- ✓ Post-quantum cryptography future-proofs the network.
- ✓ High-value recurring revenue with network effects and scale.
- ✓ Network ownership by thousands of stakers worldwide.
- ✓ Critical infrastructure for institutions, fintechs and AI agents.

## OUR COMPETITIVE MOAT

DECENTRALIZED  
VERIFICATION

POST-QUANTUM  
SECURITY

PROOF AGGREGATION  
& COMPRESSION

COMPACT  
PROOFS

NON-CUSTODIAL  
BY DESIGN

NEUTRAL • NON-INVASIVE • VERIFIABLE • SCALABLE

## THE ASK

We are raising \$5M to accelerate network, deployment, deepen enterprise integrations, expand global node distribution, and scale adoption of the QuFi verification layer.
