

INVESTMENT MEMO

THE PROOF LAYER FOR THE POST-QUANTUM ECONOMY

QuFi is the neutral verification layer that sits beneath every blockchain, moving asset, institution, and AI agent. We bring post-quantum security, real-time verification, and global scale to the value layer of the internet.

THE MOMENT IS NOW

The world is entering a post-quantum era. Digital assets, tokenized real-world assets, institutions, and AI agents are moving value at a pace the existing infrastructure was never designed to handle.

QuFi delivers the missing layer: a neutral, post-quantum, verification network that delivers cryptographic certainty before value moves and preserves decentralization without forcing migration.

NEUTRAL LAYER

We don't replace what works.

NO MIGRATION

Zero disruption for chains.

NO STATE

No state replication.

NO CONSENSUS

No consensus requirement.

POST-QUANTUM SECURITY

Quantum-resistant by design.

\$200T+

Total Addressable Market Across Digital and Real-World Assets

20,000+

Verification Nodes Deployed Globally (Target)

0.1%

Value-Proven Revenue Model (Proof Fees)

\$5M

Seed Round Target to Build Global Verification Rail

THE INVESTMENT THESIS

INSTRUCT

A transaction or financial action is defined.

VERIFY

QuFi performs the verification and produces a compact, verifiable proof.

SETTLE

The chain receives the proof and settles the resulting state.

BUILT FOR THE FUTURE

DECENTRALIZED

Operated by thousands of independent verification nodes.

SCALABLE

Horizontal scale without state bottlenecks.

VERIFIABLE

Every proof is cryptographically verifiable.

NON-CUSTODIAL

We never hold or move customer assets.

INTEROPERABLE

Built to connect every chain, system and infrastructure.

WHAT MAKES QUFI DIFFERENT?

NEUTRAL BY DESIGN

Works across any chain, any asset, any system. No bias, no lock-in.

POST-QUANTUM SECURE

Built with quantum-resistant cryptography from the ground up.

VERIFIABLE, NOT TRUSTED

Every action is cryptographically proved and independently verifiable.

NO MIGRATION REQUIRED

Integrates without changing existing infrastructure or user experience.

HIGHLY SCALABLE

Designed for billions of verifications across global systems.

ECONOMIC ALIGNMENT

Network, users, and token holders grow together.

OUR MISSION: Power the world's digital economy with verifiable trust.

OUR VISION: Become the default verification layer for global financial infrastructure.

02. THE TECHNOLOGY & PRODUCT

THE FIRST VERIFICATION LAYER THAT DOES NOT SETTLE.
IT VERIFIES, PROVES, AND PROTECTS.

QuFi is the neutral verification layer that sits beneath every blockchain, moving asset, institution, and AI agent.

It provides real-time, post-quantum verification of instructions, identities, state, and value—producing a compact, verifiable proof that any chain or system can trust.

INSTRUCT → VERIFY → SETTLE

INSTRUCT

A transaction or financial action is defined.

VERIFY

QuFi performs the verification and produces a compact, verifiable proof.

SETTLE

The chain receives the proof and settles the resulting state.

KEY CAPABILITIES

Post-Quantum Security

Real-Time Verification

Multi-Chain by Design

Proof-Gated Execution

Global Scale

Developer Friendly

QUFI VERIFICATION LAYER ARCHITECTURE

WHY QUF? (WHY THE WORLD NEEDS QUIFI)

Post-quantum threats are real and imminent.

Existing infrastructure was not built for scale.

Institutions require neutrality and verifiability.

Multi-chain growth demands a new layer.

Verification is the last missing primitive.

QuFi provides the **trust fabric** for the next internet of value.

THE FOUNDATION FOR THE NEXT INTERNET

Neutral Verification Layer

Connects Any Chain, System or Asset

Verifies Identity, State, Instruction and Value

Delivers Cryptographic Certainty Before Value Moves

Scales to Billions of Transactions Globally

THE PROOF FEE MODEL

0.1%

VALUE-PROVEN REVENUE MODEL

QuFi earns a small fee (0.1%) on the verified value of transactions.

WHY IT WORKS

- ✓ Aligned with usage and value
- ✓ Scales with adoption
- ✓ Sustainable and non-inflationary
- ✓ Simple, transparent, and verifiable

\$200T+

ADDRESSABLE MARKET

Across digital assets, real-world assets, institutions, payments, and global systems.

03. PROOF THAT THE MODEL WORKS

uBTC: OUR BITCOIN-BACKED PROOF OF CONCEPT

uBTC demonstrates the full QuFi model. Bitcoin is locked. A post-quantum proof is created. Only then can value move. This removes custodial risk and proves verification at scale.

THE uBTC FLOW: VALUE IS PROOF-GATED

1. DEPOSIT

Bitcoin is deposited into a QuFi-secured instrument.

2. CONFIRM

QuFi verifies the deposit with post-quantum signatures.

3. PROOF

A compact, verifiable proof is generated and published.

4. MOVE

Value can move or be used across any supported chain.

5. RECOVER

Assets can be recovered with the valid proof.

WHY uBTC MATTERS

- ✓ Real Bitcoin, backed 1:1
- ✓ Post-quantum security (ML-KEM + ML-DSA)
- ✓ No wrapped tokens or synthetic risk
- ✓ Proof-gated movement across chains
- ✓ Recoverable, verifiable, and auditable
- ✓ Trust minimized. Security maximized.

uBTC AT A GLANCE

Backed By	Bitcoin (BTC)
Verification	QuFi Post-Quantum Network
Proof Type	ML-KEM + ML-DSA
Use Cases	Payments, DeFi, Yield, Collateral
Status	Testnet Live - Mainnet 2025

uBTC IN ACTION

uBTC IS NOT JUST A PRODUCT. IT IS THE PROOF THAT QUFi WORKS.

Removes custodial risk

Provides verifiable certainty

Enables global interoperability

Built for scale and the future

THE VERIFICATION RAIL THAT UNLOCKS THE INTERNET OF VALUE

Any Asset
Any Chain

Any System
Any Institution

Any User
Any Location

One Verification Layer for All

QuFi creates the neutral, post-quantum verification rail that every value transfer, asset movement, and digital interaction can trust.

To Build Verification Rail

04. MARKET & BUSINESS MODEL

A MASSIVE, EMERGING MARKET AT AN INFLECTION POINT

QuFi targets the foundational infrastructure gap of the digital economy: verifiable movement of value across any asset, any chain, any system.

OUR TARGET MARKETS

DIGITAL ASSETS

Tokenized assets, stablecoins, CBDCs

TOKENIZED REAL-WORLD ASSETS

Real estate, trade finance, invoices, commodities

STABLECOINS & CBDC

Cross-border payments, settlement

TRADE FINANCE & PAYMENTS

Global trade, supply chains, B2B settlements

INSTITUTIONAL INFRASTRUCTURE

Banks, custodians, exchanges, funds, and platforms

WHY THE MARKET NEEDS QIFI

- ✓ Post-quantum threats are real and imminent.
- ✓ Existing infrastructure was not built for scale.
- ✓ Institutions require neutrality and verifiability.
- ✓ Multi-chain growth demands a new layer.
- ✓ Verification is the last missing primitive.

OUR BUSINESS MODEL

QuFi earns a small fee (0.1%) on the verified value of transactions. Fees are paid in \$QUIFI and distributed across the network.

PENETRATION SCENARIOS

1% Penetration	\$145.6M
5% Penetration	\$727.9M
10% Penetration	\$1.455B

ANNUAL NETWORK POTENTIAL

COMPETITIVE ADVANTAGE

THE FOUNDATION OF TRUST IN A POST-QUANTUM WORLD

QuFi is not here to compete with blockchains.
QuFi is the verification layer they all rely on.

By being neutral, post-quantum, and value-proven,
QuFi becomes the trust fabric of the next internet
of value.

NEUTRAL BY DESIGN

Works across any chain, any asset,
any system. No bias, no lock-in.

POST-QUANTUM SECURE

Built with quantum-resistant
cryptography from the ground up.

VERIFIABLE, NOT TRUSTED

Every action is cryptographically
proved and independently verifiable.

NO MIGRATION REQUIRED

Integrates without changing existing
infrastructure or user experience.

HIGHLY SCALABLE

Designed for billions of verifications
across global systems.

ECONOMIC ALIGNMENT

Network, users, and token holders
grow together.

WHY INVEST NOW?

THE SHIFT IS HERE

The world is moving to digital assets, tokenization, and real-time global settlement.

QUANTUM THREATS ARE REAL

Post-quantum security is no longer optional. It's a necessity for long-term trust.

NO ONE OWNS THE VERIFICATION LAYER

QuFi is building the neutral layer that every chain, asset, and system will rely on.

MASSIVE MARKET OPPORTUNITY

A \$200T+ addressable market with a clear, value-proven revenue model.

NETWORK EFFECTS DRIVE MOATS

More nodes, more assets, more usage = more secure, more valuable.

EARLY TRACTION & MOMENTUM

uBTC proves the model. The network is live. The future is being built.

QuFi is building the verification layer for the next internet of value.

**INVEST IN THE LAYER
THE WORLD WILL
BE BUILT ON.**
