

01.

THE INVESTMENT OPPORTUNITY

BUILDING THE VERIFICATION LAYER
THE WORLD WILL RELY ON.

QuFi is building the neutral, post-quantum verification layer that unlocks the next internet of value.

We verify high-value actions across any asset, any chain, any system — before value moves.

VERIFY FIRST. TRANSFER WITH TRUST.

THE OPPORTUNITY

MASSIVE MARKET

\$200T+ addressable market for digital & real-world assets in motion.

CRITICAL INFRASTRUCTURE

Verification is the missing layer across any chain, any asset, any system.

TECHNICAL BREAKTHROUGH

Post-quantum security, multi-chain verification, and neutral design from day one.

STRONG ECONOMICS

Low-cost verification with high-value capture and network effects that compound.

BUILT TO LAST

Independent, neutral, and secure — designed to become the trust fabric of the future.

QUIFI IN ONE LINE

QuFi **verifies** the actions that matter,
so **value** can move everywhere with **trust**.

1. INSTRUCT

A high-value action is requested.

2. VERIFY

QuFi cryptographically verifies the action off-chain.

3. SETTLE

Only verified actions are allowed to move on-chain.

02. TECHNOLOGY & PRODUCT

THE VERIFICATION LAYER FOR THE NEXT INTERNET OF VALUE.

QuFi is a neutral, post-quantum verification layer that sits above any blockchain or system. We verify high-value actions off-chain and only allow movement when cryptographic proof exists.

INDEPENDENT. NEUTRAL. VERIFIABLE.
SECURE BY DESIGN.

INSTRUCT → VERIFY → SETTLE

1. INSTRUCT

A high-value action is requested.

2. VERIFY

QuFi verifies the action off-chain using post-quantum cryptography.

3. SETTLE

Only verified actions are allowed to move on-chain.

Examples

- Transfer digital asset
- Release collateral
- Update ownership
- Settle payment
- Trigger contract

What QuFi Does

- Validate intent & rules
- Verify data & state
- Apply policies & approvals
- Cryptographically prove the action is valid

Outcome

- Proof is published
- Settlement is executed
- Immutable record
- System or asset updated

PRODUCT COMPONENTS

VERIFICATION NETWORK

Distributed network of independent nodes performing verification and consensus.

POLICY & RULE ENGINE

Flexible rules, approvals, thresholds and logic that define how actions are verified.

POST-QUANTUM SECURITY

Built with ML-DSA for external security and Falcon for high-speed internal verification.

PROOF & ATTESTATION LAYER

Cryptographic proofs that are tamper-proof, portable and easy to verify anywhere.

MULTI-CHAIN CONNECTORS

Connectors to any chain, protocol, system or infrastructure.

OBSERVABILITY & ANALYTICS

Real-time monitoring, performance analytics and network insights.

WHY THIS ARCHITECTURE MATTERS

STRONGER SECURITY
Post-quantum security protects high-value actions and systems.

HIGHER PERFORMANCE
Heavy verification stays off-chain; settlement remains fast and cheap.

UNIVERSAL COMPATIBILITY
Works with any chain, any asset, any system, any workload.

BUILT TO SCALE
Designed for billions of verifications across global systems.

TRUST BY DESIGN
Independent, neutral, and verifiable by anyone, anywhere.

03.

PROOF OF MODEL

uBTC: VERIFICATION IN ACTION

uBTC is the first application of the QuFi verification layer — a quantum-secure, collateral-backed Bitcoin representation that can move only when the right proofs are verified.

It demonstrates how QuFi turns cryptographic proof into economic value and real-world utility.

HOW uBTC WORKS

WHY uBTC MATTERS

- CAPITAL EFFICIENCY**
Unlocks BTC liquidity without sacrificing custody or security.
- CROSS-CHAIN UTILITY**
Moves across any chain or system with verified proofs.
- QUANTUM-SECURE**
Built with ML-DSA & Falcon for post-quantum resilience.
- INSTITUTIONAL GRADE**
Designed for institutions, protocols, and real-world finance.
- NEW FINANCIAL PRIMITIVE**
A verifiable Bitcoin representation for the next internet of value.

uBTC AT A GLANCE

	TYPE	1:1 Collateral-Backed Bitcoin Representation
	COLLATERAL	Bitcoin (BTC)
	VERIFICATION	QuFi Post-Quantum Verification Layer (ML-DSA + Falcon)
	MOVEMENT	Proof-Gated Across Any Chain or System
	TRANSPARENCY	Cryptographic Proofs & Immutable Records
	USE CASES	DeFi, Payments, Settlement, Trading, Treasury Management, and more
	TARGET USERS	Institutions, Protocols, Enterprises, Market Makers, and DAOs

uBTC proves that verification is not just a technical layer — it is economic infrastructure. It is the first, real-world example of how QuFi makes **verified value move**.

04. MARKET & BUSINESS MODEL

A GLOBAL, MULTI-INDUSTRY OPPORTUNITY.
A CLEAR, SCALABLE MODEL.

QuFi sits at the intersection of digital assets, cross-chain finance, and institutional trust. The demand for independent, verifiable actions is accelerating.

Our business model captures value from the infrastructure layer that every chain, asset, and institution will increasingly rely on.

A GLOBAL, MULTI-INDUSTRY OPPORTUNITY

The verification layer is required across every major financial and digital-asset ecosystem.

THE QUIFI BUSINESS MODEL: VALUE-PROVEN INFRASTRUCTURE

QuFi earns revenue by enabling verified value to move securely and efficiently.

REVENUE STREAMS

Diversified, usage-based, and built for scale.

The more value that moves with QuFi, the more revenue the network generates.

TOTAL ADDRESSABLE MARKET

MARKET GROWTH DRIVERS

-  **EXPLOSION OF TOKENIZED ASSETS**
Real-world assets, securities, and funds are moving on-chain.
-  **INSTITUTIONAL ADOPTION**
Institutions require independent verification they can trust.
-  **MULTI-CHAIN & CROSS-SYSTEM COMPLEXITY**
More chains, more systems, more need for neutral verification.
-  **POST-QUANTUM TRANSITION**
Security paradigms are shifting—QuFi is built for the future.
-  **DEMAND FOR VERIFIED VALUE**
Proof is becoming the new primitive for digital trust.

2. Source: MarketsandMarkets, Grand View Research – Data Verification & Security Markets.

3. Source: QuFi internal model based on expected network adoption and fee capture.

05. COMPETITIVE ADVANTAGE

WHY QUIFI IS DIFFERENT

QuFi is not another blockchain. It is the independent verification layer that every chain, asset, and institution can rely on.

Our architecture, cryptography, and neutrality give us a moat that is deep, defensible, and scalable.

QUIFI VS ALTERNATIVES

	 QUIFI	TRADITIONAL SETTLEMENT LAYERS	SMART CONTRACT PLATFORMS	ORACLE NETWORKS	BRIDGE SOLUTIONS
 Independent Neutral Layer	✓	✗	✗	✗	✗
 Post-Quantum Security	✓	—	—	—	✗
 Verification Before Settlement	✓	✗	✗	—	✗
 Works Across Any Chain	✓	✗	✓	✗	✓
 Institutional Grade Security	✓	✓	—	—	✗
 Proof Integrity & Immutability	✓	✗	—	✓	—
 Scalable Verification Network	✓	—	✓	—	—

THE MARKET OPPORTUNITY

The verification layer is a foundational market that touches every high-value digital transaction.

- ✓ Digital Assets & Tokenization
- ✓ Decentralized Finance (DeFi)
- ✓ Institutional Settlements
- ✓ Cross-Chain Infrastructure
- ✓ Payments & Stablecoins
- ✓ Data, Identity & Real-World Assets

06. NETWORK & ECONOMIC MODEL

THE NETWORK GETS STRONGER AS MORE VALUE IS VERIFIED.

QuFi sits at the center of a new digital infrastructure layer. We verify high-value actions across any chain or system and return cryptographic proof that unlocks secure movement and settlement.

Every verification increases network effects, drives demand, and strengthens the QuFi network.

THE QUIFI NETWORK

QuFi connects any action to verifiable proof and secure settlement.

NETWORK ECONOMICS: VALUE FLOWS THROUGH QUIFI

NETWORK GROWTH FLYWHEEL

ECONOMIC MODEL

Diverse and scalable revenue streams built for long-term growth.

	VERIFICATION FEES Fees for every verification request and proof generated.	Usage-based revenue from all network activity.
	uBTC MINT / BURN FEES Fees for minting and burning uBTC against verified collateral.	Captured at the core of the uBTC economy.
	ENTERPRISE SUBSCRIPTIONS Recurring subscriptions for mission-critical verification.	Long-term, predictable infrastructure revenue.
	INTEGRATION & API FEES Fees for API access, data, connectors, and integrations.	Expands as more systems build on QuFi.
	VALUE-ADDED SERVICES Premium analytics, monitoring, compliance, and SLAs.	Higher margin services for enterprise users.

07.

uBTC: PROOF OF MODEL

**uBTC IS THE FIRST ASSET
BUILT ON THE QUFI
VERIFICATION LAYER.**

uBTC demonstrates that QuFi can control, verify, and prove the movement of high-value digital assets.

It is Bitcoin—held in collateral, proven by cryptography, and released under policy—without compromise.

FROM BITCOIN COLLATERAL TO VERIFIED DIGITAL ASSET

WHY uBTC MATTERS

- REAL BITCOIN BACKING**
100% collateralized by Bitcoin held in verifiable, multi-sig vaults.
- PROOF BEFORE MOVEMENT**
Cryptographic proof required before any uBTC can be minted, moved, or redeemed.
- PROGRAMMABLE CONTROLS**
QuFi policies define who, when, where, and how uBTC can move.
- INSTITUTIONAL GRADE**
Built for institutions, compliance, and real-world financial use.
- SCALABLE BLUEPRINT**
uBTC is the blueprint for all future verified asset classes.

REDEMPTION: RETURN TO BITCOIN

KEY CAPABILITIES DEMONSTRATED BY uBTC

PROOF OF MODEL

uBTC proves that the QuFi verification layer works. It turns high-value Bitcoin collateral into a verifiable, programmable, and institutionally usable digital asset.

**uBTC IS THE FIRST OF MANY ASSETS THAT WILL RUN ON THE QUFI LAYER.
IT IS OUR PROOF. IT IS OUR FOUNDATION. IT IS OUR FUTURE.**

uBTC: INITIAL USE CASES

- INSTITUTIONAL COLLATERAL**
Use uBTC as transparent, verifiable collateral across balance sheets and transactions.
- CROSS-BORDER SETTLEMENTS**
Move value globally with cryptographic proof and policy-driven controls.
- DEFI & YIELD PLATFORMS**
Use uBTC in DeFi with verifiable backing and institutional-grade security.
- LOANS & CREDIT MARKETS**
Enable lending, borrowing, and credit markets with verified Bitcoin collateral.
- TREASURY & RESERVES**
Hold uBTC as part of digital treasury and reserve strategies.

08. SECURITY & POST-QUANTUM ARCHITECTURE

BUILT FOR A QUANTUM FUTURE.
SECURE TODAY. SECURE FOREVER.

QuFi is engineered from the ground up with post-quantum cryptography, distributed verification, and layered security isolation.

We protect intent, data, keys, and value across every part of the verification and settlement lifecycle.

THE QUFI SECURITY LIFECYCLE

POST-QUANTUM SECURE

ML-DSA / Falcon protection against quantum threats.

DISTRIBUTED & DECENTRALIZED

No single point of failure. Censorship resistant by design.

VERIFICATION BEFORE SETTLEMENT

Nothing moves until it is cryptographically verified.

FUTURE-PROOF CRYPTO-AGILITY

Algorithm agility ensures long-term resilience.

SECURITY ARCHITECTURE LAYERS

1. IDENTITY & ACCESS

- Multi-factor authentication
- Role-based access control
- Zero trust principles
- Continuous session monitoring

2. KEY MANAGEMENT

- HSM-backed key storage
- Post-quantum key pairs (ML-DSA / Falcon)
- Key rotation & lifecycle management
- Hardware isolation

3. VERIFICATION NETWORK

- Globally distributed nodes
- Independent verification
- Byzantine fault tolerance
- Slashing for malicious behavior
- Consensus on validity

4. PROOF & DATA LAYER

- Tamper-proof proof generation
- Immutable audit logs
- Merkle-style proof compression
- Encrypted sensitive data

5. INFRASTRUCTURE SECURITY

- Network segmentation
- DDoS protection
- Continuous threat detection
- Secure CI/CD & patching
- Incident response 24/7

6. GOVERNANCE & COMPLIANCE

- Policy enforcement
- Compliance monitoring
- Audit-ready logs
- Regulatory controls
- Independent oversight

POST-QUANTUM SECURITY STACK

THREAT MODEL & MITIGATIONS

SECURITY IS NOT A FEATURE.
IT IS THE FOUNDATION.

RECOVERY & RESILIENCE

WHY OUR SECURITY MATTERS

BUILT FOR THE NEXT ERA OF DIGITAL FINANCE

Quantum computing will break today's cryptography.
QuFi is already built for tomorrow.

OUR ARCHITECTURE PROTECTS INTENT.
OUR NETWORK ENSURES INTEGRITY.
OUR PROOFS PRESERVE TRUST.
OUR MISSION SECURES THE FUTURE.

09.

GO-TO-MARKET STRATEGY

VERIFICATION IS THE INFRASTRUCTURE.
ADOPTION IS OUR GROWTH ENGINE.

QuFi enters large, high-value markets where trust, compliance, and settlement are mission-critical.

Our strategy is to embed the verification layer into the systems that move the world's most valuable digital assets.

PRIMARY ENTRY MARKETS

INSTITUTIONAL DIGITAL ASSETS

Exchanges, custodians, OTCs, and digital asset platforms needing institutional-grade verification.

BITCOIN COLLATERAL

Lending, borrowing, and structured products secured by Bitcoin with cryptographic proof of control.

TOKENIZED REAL-WORLD ASSETS

Funds, real estate, commodities, and private markets requiring verifiable lifecycle controls.

STABLECOINS & PAYMENTS

Issuers and payment providers that require verifiable, compliant, and auditable movement.

CROSS-CHAIN INFRASTRUCTURE

Bridges, protocols, and networks that need independent proof across chains and systems.

GO-TO-MARKET MODEL

1. LAND

Identify and engage high-value institutions with mission-critical verification needs.

2. INTEGRATE

Embed the QuFi verification layer via APIs, SDKs, and infrastructure modules.

3. VERIFY

Go live with verifiable workflows, policies, and real transaction proofs.

CUSTOMER JOURNEY

PILOT

Validate use case and integration in a controlled environment.

PRODUCTION

Move to live environment with real transactions and monitoring.

ENTERPRISE DEPLOYMENT

Scale across departments, products, and asset classes.

NETWORK EXPANSION

Join the broader QuFi network and benefit from network effects.

DISTRIBUTION CHANNELS

DIRECT INSTITUTIONAL SALES

Dedicated enterprise team focused on top-tier financial institutions, exchanges, and custodians.

STRATEGIC PARTNERS

Collaborate with leading infrastructure, custody, and compliance providers to co-sell and co-integrate QuFi.

INFRASTRUCTURE INTEGRATIONS

Build native integrations into wallets, exchanges, DeFi protocols, and enterprise platforms.

DEVELOPER ECOSYSTEM

Enable developers with SDKs, APIs, and tools to build the next generation of verified applications.

THE COMMERCIAL FLYWHEEL

VALUE PROPOSITION BY STAKEHOLDER

INSTITUTIONS

Reduce risk, improve compliance, and gain verifiable control of assets and transactions.

USERS

Faster, safer, verifiable transactions with strong privacy and security.

DEVELOPERS

Powerful primitives and tools to build verifiable, compliant, and interoperable applications.

REGULATORS

Independent verification and auditability for transparency and market integrity.

THE ECOSYSTEM

A neutral, scalable verification layer that all chains, assets, and systems can rely on.

GO-TO-MARKET PRIORITIES (2025-2026)

01

Secure flagship institutional partnerships in digital assets and Bitcoin collateral.

02

Expand enterprise integrations across custody, exchanges, and payment networks.

03

Drive adoption in tokenized asset platforms and real-world asset issuers.

04

Scale cross-chain verification infrastructure and bridge integrations.

05

Build developer ecosystem and grow network effects through open integrations.

KEY SUCCESS METRICS

50+

INSTITUTIONAL INTEGRATIONS by 2026

\$50B+

VERIFIED VALUE ON THE NETWORK by 2026

10M+

VERIFICATION REQUESTS per month by 2026

5+

POPULAR CHAINS & NETWORKS integrated by 2026

100+

ENTERPRISE CUSTOMERS by 2026

\$25M+

ANNUAL RECURRING REVENUE (ARR) by 2026

10.

TEAM & EXECUTION

A WORLD-CLASS TEAM
BUILDING THE VERIFICATION
LAYER FOR GLOBAL VALUE.

QuFi is led by a team that combines deep technical expertise, institutional experience, and a shared vision for building the trusted infrastructure layer for the future of finance.

We know what it takes to build, scale, and execute.

We are builders. We are operators. We deliver.

EXPERIENCED FOUNDERS. DEEP EXPERTISE. SHARED VISION.

DR ALEXANDER REAY
TECHNOLOGY

- Post-quantum cryptography expert and systems architect
- 20+ years in cybersecurity, cryptography, and distributed systems
- Architect of QuFi's verification protocol and post-quantum stack
- Former academic researcher and technology entrepreneur

SAMSON LEE
BUSINESS

- Financial services and digital asset strategist
- 15+ years in capital markets, banking, and fintech
- Expert in institutional relationships, partnerships, and governance
- Former executive in global financial institutions

ERIC BENZ
GROWTH

- Growth strategist and ecosystem development leader
- 10+ years in blockchain, DeFi, and Web3 growth
- Proven track record in community building and adoption
- Former growth lead for high-growth Web3 ventures

WHY THIS TEAM IS UNIQUELY SUITED TO EXECUTE

TECHNOLOGY LEADERSHIP

Deep expertise in post-quantum cryptography, distributed systems, and security architecture.

INSTITUTIONAL & COMMERCIAL EXPERIENCE

Decades of combined experience in financial services, capital markets, and enterprise technology.

DIGITAL ASSET & BLOCKCHAIN EXPERTISE

Early builders and operators in blockchain, DeFi, tokenization, and digital asset infrastructure.

GLOBAL NETWORK & PARTNERSHIPS

Strong relationships across institutions, regulators, exchanges, and technology partners worldwide.

COMPLEMENTARY SKILLS

Technical depth, business acumen, and growth execution aligned to deliver long-term value.

STRATEGIC ADVISORS

Security & Cryptography

Renowned experts in post-quantum security and cryptographic research.

Institutional Finance

Senior advisors from global banks, asset managers, and exchanges.

Regulation & Compliance

Advisors with deep experience in global regulatory frameworks.

Tokenization & DeFi

Leaders in tokenized assets, DeFi protocols, and Web3 infrastructure.

EXECUTION PLAN

TECHNOLOGY FOUNDATION

- Core protocol development
- Security & PQ infrastructure
- Testnet and audits

PILOTS & VALIDATION

- Institutional pilots
- uBTC use cases
- Policy and controls validation
- Performance testing

INTEGRATIONS & PARTNERSHIPS

- Enterprise integrations
- Exchange & custody partnerships
- Ecosystem and developer tools

SCALE & NETWORK EFFECTS

- Global expansion
- More value verified
- Stronger network
- Recurring revenue at scale

HIRE TO SCALE

Engineering

Protocol, cryptography, and infrastructure engineers

Product

Product managers and UX designers

Business Development

Institutional sales and partnerships

Operations & Compliance

Risk, compliance, and operations

Marketing & Growth

Brand, community, and growth specialists

WHAT SETS US APART

CLEAR MISSION

Build the verification layer that secures and unlocks global value.

PROVEN APPROACH

Post-quantum security, programmable controls, and distributed verification.

REAL-WORLD TRACTION

uBTC and institutional pilots demonstrate product-market fit.

SCALABLE MODEL

Network effects, recurring revenue, and high operating leverage.

LONG-TERM VISION

Building critical infrastructure that will underpin the future of digital finance.

OUR COMMITMENT

We are building the most trusted, secure, and scalable verification infrastructure for the future.

We are committed to excellence, transparency, and long-term value creation for our partners, investors, and the ecosystem.

WE BUILD. WE VERIFY. WE DELIVER.

11.

THE RAISE & USE OF FUNDS

We are raising

\$5M

SEED / GROWTH INFRASTRUCTURE ROUND

Capital to move QuFi from architecture and validation into deployment and network scale.

THIS ROUND WILL ENABLE US TO:

- ✓ Complete core protocol and verification layer
- ✓ Harden security and post-quantum cryptographic systems
- ✓ Deploy uBTC into production environments
- ✓ Launch and scale institutional pilots and integrations
- ✓ Expand the QuFi network and infrastructure globally
- ✓ Build recurring revenue through verification and infrastructure services

THIS ROUND IS DESIGNED TO CONVERT QUIFI'S TECHNICAL ARCHITECTURE INTO DEPLOYED INFRASTRUCTURE, VALIDATED INSTITUTIONAL USE CASES AND RECURRING NETWORK REVENUE.

USE OF FUNDS

Allocation of the \$5M Raise

25% PROTOCOL & ENGINEERING
Core protocol development, verification layer, smart policies, SDKs, and tooling.

15% POST-QUANTUM SECURITY
ML-DSA / Falcon integration, HSM infrastructure, key management, audits, and security hardening.

15% NETWORK INFRASTRUCTURE
Distributed verification nodes, global infrastructure, routing, bandwidth, and network scaling.

15% PRODUCT DEVELOPMENT
uBTC product suite, enterprise portal, APIs, dashboards, analytics, and developer ecosystem.

10% INSTITUTIONAL PILOTS
Pilot deployments, integrations, compliance onboarding, and use case validation.

10% PARTNERSHIPS & BD
Strategic partnerships, integrations, market expansion, and business development.

10% OPERATIONS & COMPLIANCE
Legal, compliance, licensing, risk management, and operational scale.

OUR CAPITAL PRINCIPLES

Focused investment in infrastructure that builds long-term value.

Security and compliance built in — not bolted on.

Build for scale, resilience, and global adoption.

HOW THIS CAPITAL ACCELERATES QUIFI

FASTER DEVELOPMENT

Complete the protocol roadmap and ship production-ready infrastructure.

STRONGER SECURITY

Implement world-class post-quantum security and independent audits.

GLOBAL NETWORK

Scale verification capacity across regions and major financial hubs.

INSTITUTIONAL ADOPTION

Onboard partners and launch real-world use cases that drive network value.

RECURRING REVENUE

Grow verification demand and infrastructure revenue.

LONG-TERM VALUE

Build a defensible infrastructure layer with sustainable network effects.

MILESTONE-BASED DEPLOYMENT PLAN

1. CAPITAL RAISED

- \$5M secured
- Team expansion
- Infrastructure setup
- Strategic advisors engaged

2. CORE PROTOCOL (0-6 MONTHS)

- Complete protocol development
- SDKs & APIs
- Policy engine
- Testnet release

3. SECURITY HARDENING (3-9 MONTHS)

- ML-DSA / Falcon implementation
- HSM integration
- Security audits
- Compliance foundation

4. uBTC DEPLOYMENT (6-12 MONTHS)

- uBTC mainnet launch
- Collateral integrations
- Policy controls
- Early institutional deployment

5. INSTITUTIONAL PILOTS (9-18 MONTHS)

- Pilot programs
- Real-world volume
- Performance validation
- Compliance & risk validation

6. NETWORK SCALE (12-24+ MONTHS)

- Expand integrations
- Global node network
- Revenue acceleration
- Ecosystem growth

INTENDED OUTCOMES OF THIS ROUND

Production-ready verification infrastructure

Institutional grade security and compliance

uBTC as the industry standard for verified Bitcoin

Strategic partnerships and deep institutional integrations

Recurring revenue and strong network growth

WE ARE BUILDING THE BACKBONE FOR VERIFIED VALUE.

This capital will transform our vision into the infrastructure the world can rely on.

12.

WHY INVEST NOW

QuFi is building the independent verification infrastructure for the next generation of global finance.

We combine post-quantum security, distributed verification, and programmable controls to move high-value digital assets with absolute trust and certainty.

The foundation is built.
The momentum is real.
The opportunity is now.

01

A MAJOR INFRASTRUCTURE SHIFT IS UNDERWAY

Digital assets, tokenization, and programmable value are rapidly moving from innovation to institutional adoption.

BUT TRUST CANNOT RELY ON CENTRALIZED POINTS OF FAILURE.

- ✓ Trillions in digital assets and RWA movement
- ✓ Regulatory demand for verifiable, auditable systems
- ✓ Institutions require independent verification layers
- ✓ QuFi is the infrastructure layer beneath the next financial era

02

POST-QUANTUM SECURITY CREATES A TIMING WINDOW

Quantum computing will challenge today's cryptography. The time to build quantum-resilient infrastructure is now.

QUIETLY, QUANTUM-SECURE INFRASTRUCTURE WILL WIN.

- ✓ Post-quantum cryptography (ML-DSA / Falcon) future-proofs the network
- ✓ Crypto-agile architecture adapts to tomorrow's threats
- ✓ Early movers set the standard for the next era of security
- ✓ QuFi is built for the quantum era from the ground up

03

QUIFI HAS A TANGIBLE PROOF OF MODEL

uBTC demonstrates QuFi's architecture in a high-value, real-world use case — Bitcoin collateral.

PROOF. NOT THEORY. LIVE. NOT HYPOTHETICAL.

- ✓ Bitcoin-backed and verifiable
- ✓ Mint, movement, policy controls, and redemption
- ✓ Operating on QuFi's verification layer today
- ✓ A replicable model for many asset classes

04

NETWORK ECONOMICS CAN COMPOUND

As more value moves through QuFi, the network gets stronger, more efficient, and more valuable.

MORE INTEGRATIONS. MORE VERIFIED VALUE. MORE DEMAND. STRONGER INFRASTRUCTURE.

- ✓ More integrations drive more verified value
- ✓ More verified value drives more verification demand
- ✓ More demand drives greater capacity and resiliency
- ✓ A virtuous flywheel that compounds over time

05

THE TEAM AND TIMING ALIGN

Deep technology. Institutional experience. Global perspective. Delivered at the right moment in history.

THE RIGHT TEAM. THE RIGHT VISION. THE RIGHT TIME.

- ✓ Proven expertise in technology, finance, and growth
- ✓ Institutional networks and strategic relationships
- ✓ Execution track record in building and scaling
- ✓ Market momentum and regulatory clarity are accelerating

A FOUNDATIONAL LAYER FOR GLOBAL FINANCE

INDEPENDENT VERIFICATION

Trust without centralization.

POST-QUANTUM SECURITY

Built for the next cryptographic era.

PROGRAMMABLE CONTROLS

Policy-driven movement with cryptographic proof.

DISTRIBUTED RESILIENCE

No single point of failure.

INSTITUTIONAL GRADE

Built for compliance, audit, and scale.

INFINITE POSSIBILITY

One layer. Any asset. Global impact.

THE MOMENT IS NOW

Infrastructure built today will define the financial system for decades to come. QuFi is building that foundation — and we are just getting started.

JOIN US. BUILD THE FUTURE OF GLOBAL VALUE.

THE OPPORTUNITY AT A GLANCE

\$10T+

DIGITAL ASSETS & TOKENIZED RWA BY 2030¹

10X+

POST-QUANTUM SECURITY MARKET BY 2030²

100B+

VERIFICATION REQUESTS POTENTIAL³
