

PRODUCT OVERVIEW

A NEW INFRASTRUCTURE LAYER FOR THE POST-QUANTUM ECONOMY

QuFi is the neutral verification rail for digital value. We provide the cryptographic certainty layer that sits beneath every blockchain, moving asset, institution, and AI agent. We bring post-quantum security, real-time verification, and global scale to the value layer of the internet.

NEUTRAL LAYER

No new L1.
Works with all chains.

NO MIGRATION

Zero disruption for institutions and systems.

NO STATE

No state replication.

NO CONSENSUS

No consensus requirement.

POST-QUANTUM SECURITY

Quantum-resistant by design.

WHAT IS QIFI?

QuFi is a verification network that delivers cryptographic certainty before value moves. It is not a blockchain. It does not settle. It verifies, proves, and protects.

- ✓ **VERIFY ANYTHING.** Transactions, balances, identities, instructions, states, and more.
- ✓ **ACROSS ANY CHAIN.** Bitcoin, Ethereum, Solana, Stellar, private chains, and more.
- ✓ **WITHOUT MIGRATION.** Connect via API or node. No disruption. No re-platforming.

HOW QIFI CREATES VALUE

INSTRUCT

A transaction or financial action is defined.

VERIFY

QuFi performs the computationally expensive verification and emits a compact, verifiable proof.

SETTLE

The chain receives the proof and settles the resulting state.

BUILT FOR THE FUTURE

QuFi is purpose-built for a world where value is digital, permissionless, global, and increasingly powered by AI agents. Our architecture is:

DECENTRALIZED

Operated by thousands of independent verification nodes.

SCALABLE

Horizontal scale without state bottlenecks.

VERIFIABLE

Every proof is cryptographically verifiable.

NON-CUSTODIAL

We never hold or move customer assets.

INTEROPERABLE

Built to connect every chain, system and infrastructure.

WHERE QIFI CREATES IMPACT

DIGITAL ASSET SETTLEMENT

TOKENIZED ASSETS

STABLECOINS & CBDC

TRADE FINANCE & PAYMENTS

AI AGENT TRANSACTIONS

CROSS-CHAIN SETTLEMENT

INSTITUTIONAL INFRASTRUCTURE

02.2 PRODUCT CAPABILITIES

POST-QUANTUM SECURITY

Quantum-resistant cryptography safeguards value for decades to come.

REAL-TIME VERIFICATION

Verify in milliseconds. Proofs are compact, fast, and efficient.

MULTI-CHAIN BY DESIGN

One verification layer for all chains, systems, and environments.

PROOF-GATED EXECUTION

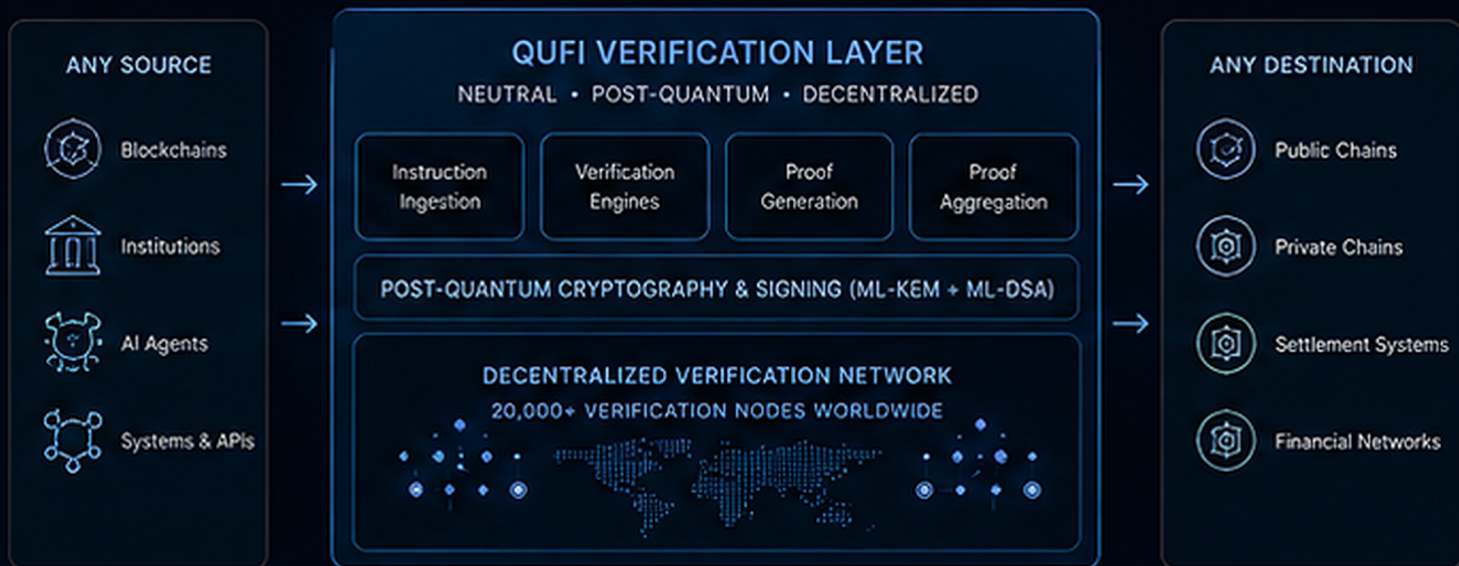

Value moves only when a proof is delivered and verified.

GLOBAL SCALE

Built to serve billions of transactions across the world.

PRODUCT ARCHITECTURE

PRODUCT DIFFERENTIATORS

We don't replace what works.

We don't require consensus.

We don't replicate state.

We provide the missing piece.

We unlock the future.

WHO IT'S FOR

QuFi is built for organizations that need provable certainty, without re-platforming or compromising on performance, security, or sovereignty.

FINANCIAL INSTITUTIONS

- Banks & Custodians
- Exchanges
- Market Infrastructures
- Payment Providers

ENTERPRISES

- Global Corporations
- ERP & Treasury Systems
- Supply Chain Platforms
- Data & Identity Systems

WEB3 & DEFI PROJECTS

- Wallets & DApps
- DeFi Protocols
- Bridge & Layer-2s
- NFT & Gaming Platforms

GOVERNMENTS & REGULATORS

- CBDC Initiatives
- Regulatory Reporting
- Public Sector Systems
- Digital Identity

OUR MISSION: Power the world's digital economy with verifiable trust.

OUR VISION: Become the default verification layer for global financial infrastructure.
